

EXECUTIVE YELLOW BELT THIS DECEMBER

EXECUTIVE YELLOW BELT THIS DECEMBER

Dear Ladies and Gentlemen,

Following on from the recent launch of a regional branch in Singapore, UMS is pleased to announce an Executive Yellow Belt class to be held in Singapore on Tuesday and Wednesday, December 1-2. The class, lasting 1.5 days will cover such topics as Business Excellence leadership with focus on application of the Lean Six Sigma method as a problem solving mindset. It is particularly pertinent to those Senior Managers or Executives who are or who expect to be involved in the launch of a Lean Six Sigma program.

UMS classes have proved especially popular over the last 30 years and this one is no exception. The interactive hands-on approach, leadership relevant matters covered in class and the opportunity for discussion with like-minded business leaders are a source of inspiration, providing ideas and impulses in the area of Business Excellence deployment.

In order to foster fruitful discussion and networking we will invite all training participants and other interested persons to an after work event on Tuesday evening creating an opportunity to continue discussion in a business casual atmosphere. Feedback from those who have attended this format so far has shown that this concept is particularly popular.

If you would be interested in attending or know of someone who would be then please contact Ms. Dominique Wiseley at dw@ums-gmbh.com for more details.

We look forward to your reply.

Kindest regards,

SABINE VON HANSTEIN
General Director

TOMASZ BOREK
Business Manager International
